BENCHMARKING: QUARTILES 2024/25

Guidance on interpreting the tables

Individual schools are not identified in the data. The tables have been constructed as follows:

- Schools have been grouped together according to the proportion of pupils entitled to free school meals.
- Within each group the school results have been ranked from the lowest performing school to the highest.
- The data within each table is presented in terms of:
 - lower quartile;
 - median;
 - upper quartile; and
 - 95th percentile.
- The lower quartile figures in each line of a table are the actual results of the school which was a quarter of the way up the scale i.e. the results achieved, or bettered, by 75% of schools in the group.
- The median figures are the actual results of the school in the middle of the scale i.e. the results achieved, or bettered, by 50% of schools in the group.
- The upper quartile figures are the actual results of the school three quarters of the way up the scale i.e. the results achieved, or bettered, by 25% of schools in the group.
- The 95th percentile figures are the actual results of the school 95% of the way up the scale i.e. the results achieved, or bettered, by the top 5% of schools in the group.

The (fictional) example on the following page may be useful in understanding how the benchmarking data have been calculated.

Example

A secondary (non-grammar) school has 15% of children entitled to free school meals. 41.2% of its Year 12 pupils achieved 5 or more GCSEs (or equivalent) at grades A*-C, including English and mathematics. To be able to compare its result in this indicator, the school would look at the table for non-grammar schools and find those schools with 0-29.99% Free School Meals. For the purposes of this example, such a table is partly reproduced below:

Schools with 0 – 29.99% of children entitled to free school meals (47 schools):

	Lower quartile	Median	Upper quartile	95 th Percentile
% of pupils doing A-levels or equivalents achieving 2 or more at grades A*-E	93.8	96.8	100	100
% of Year 12 pupils achieving 5 or more GCSEs (or equivalent) at grades A*-C including English and mathematics	25.8	36.6	44.2	54.2
% of Year 12 pupils achieving 5 or more GCSEs (or equivalent) at grades A*-C	40.3	50.9	62.9	71.4

The median is the middle value when all the results are ranked in ascending order. In this example, the 24th school has a result of 36.6% i.e. lower than the school's result of 41.2%.

The school has a result of 41.2%, which places it between the median and upper quartile of results for schools in the same FSM band.

The top 25% of schools in this FSM band achieve at least 44.2%. This could form the basis of a target for the school, as 41.2% currently achieve this indicator.
